DETAILED ACTION

Election/Restrictions

Applicant's election of Claim 1-49 in the reply filed on September 24, 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: numeral 22 of Amended Figures 3A filed on October 3, 2007. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "52" and "56" have both been used to designate cartridge

holder assembly. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "56" has been used to designate both cartridge holder assembly and keyway notch. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Response to Amendment

The applicant amended the specification to remove reference to Figure 9 and the word "pump". Thus, the objection of the specification is withdrawn.

The applicant amended the Figure 3A on October 3, 2007 and Figure 5 on September 24, 2007. The objection of Figure 5 is withdrawn.

Figure 3A still shows numeral 22. The objection stands.

The objection to the failure to mention numeral 97, which appears in Figure 2, is withdrawn.

The applicant states "applicant can find no reference-to-reference number 56 being used to designate a cartridge holder assembly". The objection stands since Examiner finds the reference number 56 as cartridge holder assembly on Page 7, Paragraph [0031] of the original specification.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 1-8, 10-19, and 21-49 are allowed.

Regarding Claim 1, the Pope (US Patent No. 4,578,246) and Eguchi et al. (JP 9-53099) references disclose the claimed apparatus except for the housing having an outer wall layer of spiral wound paper tubing. There are many references disclose the spiral wound paper container and/or tubing. However, no references disclose to be used as a grease collection cartridge/reactor for making soap in which a mixing mean is placed and the spiral wound paper tubing can withstand the heat being released during the reaction.

Claims 2-8, 13-19, 23-49 are dependent claims of claim 1.

Regarding Claims 10-12, the references disclose the apparatus except for the main shaft has a "z" shaped cross section. No references can be found for this "z" shaped cross section of the main shaft.

Regarding Claim 21, the references disclose the disposable grease collection cartridge of claim 21 except for the mixing baffle with a "z" shaped main shaft.

Regarding Claim 22, the references disclose the disposable grease collection cartridge of claim 22 except for the mixing baffle with a "z" shaped main shaft and the spiral wound paper tubing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Huy-Tram Nguyen whose telephone number is 571-270-3167. The examiner can normally be reached on M - F: 7:30 AM - 5:00 PM (Alternated Friday off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Walter Griffin can be reached on 571-272-1447. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
